NEW ADDICTIONS: THE MENACE OF THE "HARMLESS" DRUGS

Tranquilizers, pep-up pills and other seemingly innocent new drugs are making thousands of new addicts every year, this internationally recognized drug authority says in an interview with Sidney Katz, associate editor of Maclean's

DR. G. BELL, 50, is the director of a Toronto clinic that studies and treats addicts. He is also a senior lecturer at the University of Toronto. A member of the world's leading board of the Addiction Research Foundation, he was a consultant to the Ontario Department of Health Services.

DR. BELL, YOU HAVE EXPLORED WHY CONSUMERS BUY THE UNBROKEN BOTTLES OF THE NEW DRUGS. — CAN YOU EXPLAIN THE DRUG FETTER?

I am alarmed because each year dozens of new drugs appear on the market and the public enthusiastically consumes lots of them. The tragedy, which all the drug firms in this country know, is that the effect of taking these new pills is usually lost in terms of time — often three days or even a week after taking, and that addiction to them can lead to physical breakdown and general deterioration even death.
